Brimfield Fire Department
Brimfield, OH

The Brimfield Fire Department wanted their dark, outdated kitchen renovated to make the space more efficient and easier to maintain. New durable and easy to clean stainless steel countertops were installed. The new countertops offered more space, while new modern cabinets provided much needed additional storage. The flooring and ceiling were replaced. The new ceiling and walls were given a fresh coat of paint. The former opening for the fire pole was revealed and refinished to its original glory. The firefighters loved the end result.
